Course Description:

This course explores topics that are relevant to understand the causes and implications of economic development. We will start by analyzing the concepts of poverty, inequality, well-being, and economic growth. Then, we will study how individuals make decisions, considering the institutional and economic features present in developing countries. We will discuss topics such as health, education, credit, social programs and policies

targeted at the poor. The main topics of the courses will be covered by the required textbook listed below, as well as journal articles, class notes, and slides. For the midterms and final exams you are expected to be ready to answer questions on all the material covered in the course, including topics discussed in lectures and assignments (even when the material is not covered by the main textbook).

Prerequisites:

The course prerequisites are Principles of Microeconomics (ECO 2013) and Principles of Macroeconomics (ECO 2023). The course content will also draw heavily on material contained in MAC 2233 (or higher) and ECO 3101. If you have not successfully completed these courses, you should familiarize yourself with the related sections of Hal Varian's Intermediate Microeconomics: A Modern Approach, and Margaret Lial, Raymond Greenwell, and Nathan Ritchey's Calculus with Applications. If you have any questions on this matter, I will be happy to guide you during my office hours.

Readings

The readings of this course will include a main required textbook that will cover most of the topics, as well as complementary books and journal articles.

Main Textbook (required):

Julie Schaffner, *"Development Economics: Theory, Empirical Research and Policy Analysis"*, John Wiley and Sons, Inc., 2014.

Other Suggested Books:

Abhijit Banerjee and Esther Duflo, *"Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty"*, Public Affairs, 2011.

D. Perkins, S. Radelet, D. Lindauer, S. Block, *"Economics of Development"*, 7th Edition, W. W. Norton, New York and London, 2012.

Grading:

Grading will be based on two midterms, a final exam, problem sets and class participation. If you cannot attend an exam for a valid, documented reason, you must contact me prior to the start of the exam. If a student misses an exam and fails to provide a valid justification, the grade in that exam will be zero. Problem set grading will be based mostly on effort, while exam grading will place a higher weight on correctness. The due date of each problem set will be announced in class. Late assignments will not be accepted. The weight of each of this components in your final grade will be as follows:

	Date	% in the final grade
Midterm 1	September 21 (in class)	25%
Midterm 2	October 31 (in class)	25%
Final Exam	December 15 (10:00AM - 12:00PM)	25%
Problem Sets	TBD	15%
Class Participation		10%

The following scale will be used to determine your final letter grade:

A	93 - 100
A-	90 - 92.99
B+	87 - 89.99
B	83 - 86.99
B-	80 - 82.99
B+	77 - 79.99
C	73 - 76.99
C-	70 - 72.99
D+	67 - 69.99
D	60 - 66.99
E	0 - 59.99
